Information about the flooring

Wetrok AG cannot accept any liability for damages due to improper use.
For security information, see the safety data sheet at www.wetrok.ch.
Wear protection: gloves, safety goggles, work clothes
Follow the information and remarks on the label, product data sheet and material safety data sheet.
The product data sheet describes the product and gives information about its application, storage. See www.wetrok.ch
The recommended colours of pad and brushes consist to the actual wWetrok product range
Follow the special cleaning and care instructions of the floor manufacturer
The cleaning and care instructions are recommendations and suggestions and apply to floorings in object quality.

Strong alkalines can destroy or discolour wood coverings. Use a special basic linoleum cleaner!
Laminated coverings are sensitive to abrasive pads and brushes.

Water can penetrate into the laminated covering through the joints.
Distinguishing feature: appearance of wood, bright sound when tapped.
Allow it to dry completely before applying a protective treatment! Allow longer drying times than for non-porous coverings such as PVC.

Humidity variations cause wood to shrink (dry out) or swell (exposure to moisture) and, possibly, warp (moisture).

Distinguishing feature: appearance of wood, dull sound when tapped.

Remove loose dirt before every cleaning, damp mop smooth floors and vacuum structured floors.
Cleaning agents and surface treatments may alter the appearance and properties of a floor's surface.
Test on an inconspicuous spot to find which product is suitable for your requirements.
Test beforehand on an inconspicuous spot to see if the cleaning agent or surface treatment damages the floor.
Dirt-trapping zones, incl. dirt-trapping mats (Wetrok Gardamat) in the entrance, at least 7m long, greatly reduce the amount of dirt tracked into the building.

If you have any questions, please don't hesitate to contact us.
