Discomatic Samba XT: cleaning excellence in the tightest of spots

When conditions get a bit cramped, the limitations of big cleaning machines tend to be exposed. This is where Wetrok's Discomatic Samba XT comes into its own. It has been specifically designed for use in small spaces and compares well with any of its bigger rivals in terms of performance.

It is compact, extremely flexible, and, despite its spirited nature, light and pleasant to manage. The Discomatic Samba XT scrubber-drier is unbeatable in tight spaces and proves its worth, for example, when cleaning floors in filling station shops, take-aways, restaurants, bars, kitchens and other rooms with similar dimensions. Key features of this high-performance machine are the large water tanks for extended periods of use and its robust design ensuring a long service life. All components, apart from the brush's aluminium housing, are made of stainless steel.

Soft starting and smart automatic power cut-off

The ergonomically designed control panel has a handle so it can be adjusted to the height of the specialist cleaning personnel using it. When in the vertical position, the machine's turning radius reduces so it can neatly deal with tight bends too. Thanks to the soft starting concept, the Discomatic Samba XT does not set off at a gallop, but gently builds up to reach full speed within a few seconds. It also knows itself when it reaches troublesome spots like drain covers. The automatic power cut-off stops the motor immediately. Once it finds itself back on a more suitable surface, the machine starts up again straightaway.

Great productivity and improved hygiene - no need to choose

Users of the Discomatic Samba XT can clean 1,200 square metres per hour. This puts it in a different league to the manual method using a bucket and mop. The mop is also left trailing when it comes to hygiene. Whereas the water in the bucket keeps getting dirty, even when it is changed diligently, the Discomatic Samba XT cleans every last centimetre of the floor with fresh water from the 15 l capacity fresh water tank. The result is impeccable hygiene. Excellent suction performance means floors dry out quickly, so the machine can even be used during normal working and operating hours. The great productivity achieved through massive time savings, the excellent cleaning results, and the long intervals between maintenance ensure an investment in the machine will more than pay for itself in no time at all.

Ease of use provides the motivation

The Discomatic Samba XT is a joy to work with. Operation is child's play. The same goes for caring for the machine. The dirty water tank can be removed in a matter of seconds and emptied anywhere. With its compact design and retractable handle, the Discomatic Samba XT will fit in any car's luggage compartment.

Discomatic Samba XT - short version

Mobility with character

Discomatic Samba XT: cleaning excellence in the tightest of spots

Wetrok's compact Discomatic Samba XT scrubber-drier has been specifically designed for use in small spaces. Key features of this high-performance machine are the robust stainless steel and aluminium design, the easy-to-adjust control panel and the clever soft starting concept which provides control when starting up the machine. Another unique feature is the smart automatic power cut-off when the machine reaches critical spots like drain covers. Able to clean 1,200 square metres per hour and deliver impeccable results in hygiene terms, the Discomatic Samba XT trounces the mop in every area. It is also incredibly easy to use.
