Wetrok Karpfrost

Freeze spray

Recommended dosage:

Undiluted

Benefits:

Freeze spray for easy removal of chewing gum and elastomers. Uses a practical spray can.

Application:

For cleaning temperature-shock-resistant surfaces (textiles and hard floor coverings).

Please note:

Wetrok Karpfrost must not be used to cool injuries. Also available in the Karpothek set for removal of a variety of stains on textile surfaces.

Properties:

Powerful cooling
Not water-soluble
Colourless
Flammable

pH value of concentrate:

-

Important ingredients:

Solvent, propellant

Storage/shelf life:

Store in original container in a cool, well-ventilated place. Protect from frost. The container is pressurised. Protect from direct sunlight and temperatures over 50 °C. Even after usage, do not open using force and do not burn. Shelf life (unopened): 24 months.

Recommended application methods:

Removing chewing gum

Spray the chewing gum with Karpfrost. Wait until the chewing gum is white (which means it is frozen hard). Then pound the chewing gum with a plastic spatula and scrape it off. Vacuum up the pieces immediately (by dry vacuum). Repeat the process if necessary.
